

Flexible IT acquisition for business users

Syscap has been arranging IT finance since 1990, during which time we've grown to become the UK's leading independent IT finance provider.

Being independent means we have consistently delivered the strongest underwriting support in the business, so we are well placed to finance any type and any size of IT acquisition.

Fund your IT with Syscap and you not only work with the most innovative, customer focused specialists in the business, you will also benefit from the considerable business advantages associated with flexible financing.

Helps cashflow

By making equal monthly payments over the duration of the finance agreement, system users are able to spread their payments over the useful life of their equipment.

Comprehensive

Our solutions enable you to finance software and intangibles as well as hardware.

Tax benefits

With finance from Syscap, monthly payments can qualify as a trading expense and are therefore tax-deductible.

Ultimate flexibility

Lease or finance your IT and you can expand or upgrade your system as the need arises, often without increasing your monthly payments. Leasing with Syscap offers more flexibility than any other form of finance.

Frees up cash

Instead of spending lump sums on rapidly depreciating assets, users can allocate scarce resources where they are most needed.

Bank lines unaffected

Our finance solutions have no effect on your other borrowing options.

No security required

Most of our finance options do not require users to pledge personal or company assets. The equipment itself is its own source of security.

Ease

IT finance with Syscap is easy. Once your proposal is submitted, we aim to provide a response within 24 hours. If you are successful, you sign just one contract and we take it from there.
